DIY MOT FOR YOUR PC

AVANQUEST SOFTWARE LAUNCHES VCOM FIX-IT UTILITIES PROFESSIONAL 7 TO KEEP YOUR PC IN FINE WORKING ORDER

Avanquest Software, a leading developer and global publisher of best-selling personal and professional software, has announced the UK release of VCOM Fix It Utilities Professional 7. Fix It Utilities is an award winning, full maintenance, diagnostic tool for the PC that will optimise the performance of any PC identifying and repairing problems before they occur.

Anyone using a PC frequently will need to conduct regular maintenance to ensure that the system is working properly, is virus free and the performance is not impaired by unnecessary or undesirable software applications including Spyware. Fix-It Utilities will automate essential PC maintenance to ensure programs load smoothly and run at optimal speed and is also Vista compatible.

“Most of us forget to conduct any maintenance at all on our PCs and wonder why, on occasions, it doesn’t work. If we are to expect them to work consistently well, users do need to look after their machine from time to time. VCOM is a thorough-bred in this type of software and version 7 is no different, offering a comprehensive remedy to most of the problems we are ever likely to encounter,” says Jon Silvera, Managing Director of Avanquest Software UK consumer division.

Fix-It Utilities 7 Pro protects the PC through a complete schedule of preventive maintenance, including advanced hardware diagnostics, correcting and optimising the registry and clean-up of ‘computer residue’ left from installed and uninstalled software downloads. Other monitoring and problem solving features include:

- **Virus Scanner Pro** – up to the minute virus protection. Active real-time monitoring and clean up tool for quick and easy removal of detected viruses
- **Anti Spyware** – scans, detects and removes the latest in Spyware and Greyware from the system
- **Startup Commander** – Identifies and enables the removal of start up programs that slow down, and may even harm, the system

- **SMARTDiskCheck** – A hard disk failure early warning system to notify the user before data is lost
- **PCDiagnostics™** - Checks and reports on the installed system hardware including memory, hard drives, USB, network / video / sound cards and DVD drive etc.
- **SystemMonitors** – Monitors system resources and warns when resources reach critical levels
- **ErrorTracker** – Logs all Windows error messages to assist in trouble-shooting system problems

Notes to Editor:

VCOM Fit It Utilities 7 Pro is available for £29.99 inc VAT from www.avanquest.co.uk/shop
